Summary of the Response to the Decision

Applicants have concurrently submitted RCE, with which this Amendment is filed for entry. By this Amendment, Applicants have amended independent claim 1. Accordingly, claims 1 and 4-34 remain pending for further consideration.

Rejections under 35 U.S.C. § 103(a)

With regard to independent claim 1, as newly-amended, Applicants respectfully submit that all of the applied references, whether taken individually or in combination, do not teach or suggest a claimed combination including at least a feature of "a protective film formed between the seal cover plate and a stacked multi-layer of the electro-luminescent layer, the metal electrode and the heat exhausting layer wherein the protective film has a multi-layer structure of at least a moisture-absorbing layer and a moisture-proof layer."

M.P.E.P. §2143.03 instructs that "[t]o establish *prima facie* obviousness of a claimed invention, all the claim limitations must be taught or suggested by the prior art. *In re Royko*, 490 F.2d 981, 180 USPQ 580 (CCPA 1974)."

Accordingly, for at least the reasons set forth above, Applicants respectfully assert that the rejection of claim 1 under 35 U.S.C. § 103(a) should be withdrawn because all of the applied references, whether taken individually or in combination, do not teach or suggest each and every feature of independent claim 1, as newly-amended. Furthermore, Applicants respectfully assert that the rejection of claims 4-9 and 34 should also be withdrawn at least because of their dependencies upon independent claim 1, and for the reasons set forth above.

Moreover, Applicants respectfully submit that claims 10-33 are also patentable over the applied references, and therefore the rejections of claims 10-33 should be withdrawn.

Applicants respectfully submit that at least claims 1 and 4-34 are in condition for allowance.

**CONCLUSION**

In view of the foregoing, Applicants respectfully request entry of the amendments, reconsideration and the timely allowance of all pending claims.
